Kristof K. **Drexler**

MSc. Autonomous Systems

k.k.drexler@gmail.com

+45 911 01679

Skills

Python · Typescript · Javascript · Kotlin · Elixir · Unity · Google Cloud Platform

Next.js · React · React Query · Svelte · Axios · Material UI · Ktor

Phoenix · Pandas · Polars · PyTorch · NumPy · fastAPI · RabbitMQ

openCV · Deep Learning · LLM · Docker · Kubernetes · Linux · Android Studio

Digital Ocean · Blender · Adobe suite · PostgreSQL · Test Driven Development

Experience

2022 - Present *Copenhagen, Denmark*

Metriks ApS

Lead Frontend Engineer

- Responsible for designing and developing webapp frontend from the ground up
- Later took up responsibilities in the backend development and DevOps
- Tech stack: React, Redux, Next.js, fastAPI, Redis, Docker, TypeScript, Python

2021 - 2022 *Budapest, Hungary*

MaxWhere Solutions Ltd.

Junior Software Engineer

- Part of the team developing bespoke digital twin solutions for clients
- Implemented system for real-time visualization of additive manufacturing processes
- Tech stack: React, Vue, Three.js, Electron, TypeScript, Python

2020 - 2021 *Budapest, Hungary*

Profirent Kft.

Junior Software Engineer

- Supported sales team with scripting and automation
- Developed AI solution to automate archiving, saving ~300 hours of manual data entry
- Tech stack: Python, PyTorch, Google Tesseract

2019 *Budapest, Hungary*

Robotizálunk Kft.

Engineering Intern

- Worked on automating inventory management of warehouses using drones
- Responsible for developing image recognition software on drone and server-side
- Tech stack: Python, OpenCV, PyTorch, TorchVision, ROS

Education

2022 - 2024 *Lyngby, Denmark*

Technical University of Denmark

MSc. Autonomous Systems

- Master's education focusing on Robotics, Control, AI, and Human-Computer Interaction
- Specialized in Computer Vision and Deep Learning for Autonomous Systems
- Thesis project: Global Localization of Earthly Images powered by Deep Learning

2018 - 2022 *Budapest, Hungary*

Budapest University of Technology and Economics

BSc. Mechatronical Engineering

- Bachelor's education focusing on Mechanical, Electrical, and Control Engineering
- Specialized in Cyberphysical Systems and Robotics
- Thesis project: Implementing Additive Manufacturing Processes in Digital Twin Systems

Projects and Achievements

2024 *Copenhagen, Denmark*

LOCUS Image Geolocation Webapp

MSc. thesis project

- Full stack Deep Learning project with webapp deployed on the cloud
- Implemented a novel method for global image localization using deep learning
- Developed using cuttintg edge technologies in MLOps, Webdev, and Deep Learning
- Tech stack: SvelteKit, TailwindCSS, TypeScript, PyTorch, Polars, PostgreSQL, Docker

2024 *Lyngby, Denmark*

BEST Copenhagen ValHacks hackathon

3rd place winner

- Developed a solution for processing audio signals for sleep monitoring of babies
- Created a bespoke webapp for integrating with client hardware
- Awarded for being only team to implement user-facing features with intuitive design

2023 *Lyngby, Denmark*

Teaching Assistant at Technical University of Denmark

Machine Learning and Data Mining | Introduction to Programming

- Assisted students in understanding complex topics in Machine Learning and Data Mining
- Developed communicating ideas clearly, transcending skill and language barriers
- Commended for ability to give clear and concise explanations and positive attitude
