Kristof K. **Drexler**

MSc. Autonomous Systems

k.k.drexler@gmail.com

+45 911 01679

Skills & Experience

Cloud Computing | Computer Vision | Deep Learning | LLM | Containerization | Linux | 3D modelling | Big Data | Test Driven Development | Fullstack Development | Coffee Drinker

2024 - Present *Copenhagen, Denmark*

Kauza ApS

ML ninja

- Developing advanced language models to drive industry-leading consumer data products
- Operating at scale with robust data governance
- Tech stack: Python, GCP, and all the blazing-fast Rust libraries 🔥

2022 - 2024 *Copenhagen, Denmark*

Metriks ApS

Lead Frontend Engineer

- Redesigned and built a new and modern webapp frontend with sleek, responsive UI/UX
- Stepped into backend and DevOps to keep things running fast and smooth
- Tech stack: React, Redux, Next.js, FastAPI, Redis, Docker, TypeScript, Python

2021 - 2022 *Budapest, Hungary*

MaxWhere Solutions Ltd.

Junior Software Engineer

- Engineered custom digital twin platforms tailored to client needs
- Built real-time visualization tools for additive manufacturing workflows
- Tech stack: React, Vue, Three.js, Electron, TypeScript, Python

2020 - 2021 *Budapest, Hungary*

Profirent Kft.

Junior Software Engineer

- Empowered the sales team with scripting, automation, and custom tools
- Delivered AI-powered archiving solution, eliminating ~300 hours of manual work
- Tech stack: Python, PyTorch, Google Tesseract

2019 *Budapest, Hungary*

Robotizálunk Kft.

Engineering Intern

- Built drone-powered automation systems for warehouse inventory management
- Developed image recognition software for both onboard and server-side processing
- Tech stack: Python, OpenCV, PyTorch, TorchVision, ROS

Education

2022 - 2024 *Lyngby, Denmark*

Technical University of Denmark

MSc. Autonomous Systems

- Master's education focusing on Robotics, Control, AI, and Human-Computer Interaction
- Specialized in Computer Vision and Deep Learning for Autonomous Systems
- Thesis project: Global Localization of Earthly Images powered by Deep Learning

2018 - 2022 *Budapest, Hungary*

Budapest University of Technology and Economics

BSc. Mechatronical Engineering

- Bachelor's education focusing on Mechanical, Electrical, and Control Engineering
- Specialized in Cyberphysical Systems and Robotics
- Thesis project: Implementing Additive Manufacturing Processes in Digital Twin Systems

Projects and Achievements

2024 *Copenhagen, Denmark*

LOCUS Image Geolocation Webapp

MSc. thesis project

- Full stack Deep Learning project with webapp deployed on the cloud
- Implemented a novel method for global image localization using deep learning
- Developed using cuttintg edge technologies in MLOps, Webdev, and Deep Learning
- Tech stack: SvelteKit, TailwindCSS, TypeScript, PyTorch, Polars, PostgreSQL, Docker

2024 *Lyngby, Denmark*

BEST Copenhagen ValHacks hackathon

Placed 3rd

- Developed a solution for processing audio signals for sleep monitoring of babies
- Created a bespoke webapp for integrating with client hardware
- Awarded for being only team to implement user-facing features with intuitive design

2023 *Lyngby, Denmark*

Teaching Assistant at Technical University of Denmark

Machine Learning and Data Mining | Introduction to Programming

- Assisted students in understanding complex topics in Machine Learning and Data Mining
- Developed communicating ideas clearly, transcending skill and language barriers
- Commended for ability to give clear and concise explanations and positive attitude
