About

Machine Learning Engineer working the production side of the stack — dataset generation, feature engineering, training, deployment, and monitoring. Currently building LLM pipelines at Numerator that turn large volumes of unstructured images and text into structured data products at scale, on AWS with Python, Kubernetes, Terraform, and Snowflake. Background in Computer Vision, Deep Learning, and LLMs — and the MLOps that gets them into production. The same experience is used to run a two-site personal homelab.

Experience

2026 — Present *Copenhagen, Denmark*

Numerator

Machine Learning Engineer

- Build and operate production LLM pipelines for FMCG market analytics — owning model deployment, CI/CD, and post-deployment monitoring on AWS
- Manage ML services on Kubernetes, IaC with Terraform, and CI/CD via GitHub Actions
- Built a receipt-dewarping module that fits a homography from OCR word-box geometry to correct perspective ahead of LLM extraction — improving downstream extraction reliability

Python · SQL · AWS · Snowflake · Transformers · LLMs · Terraform · Kubernetes · CI/CD

2024 — 2026 *Copenhagen, Denmark*

Kauza ApS **acquired by Numerator, 2026**

Machine Learning Engineer

- Developed transformer-based extraction / classification for industry-leading FMCG products
- Built data pipelines and cloud deployment infrastructure on GCP using Terraform and Docker

Python · Rust · GCP · BigQuery · Transformers · Terraform · Docker · PostgreSQL

2022 — 2024 *Copenhagen, Denmark*

Metriks ApS

Lead Frontend Engineer

- Redesigned and built a modern webapp with sleek and responsive UI/UX
- Stepped into backend and DevOps to keep things running fast and smooth

React · Redux · Next.js · FastAPI · Redis · Docker · TypeScript · Python

2021 — 2022 *Budapest, Hungary*

MaxWhere Solutions Ltd.

Junior Software Engineer

- Engineered custom digital twin platforms tailored to client needs
- Built real-time visualization tools for additive manufacturing workflows

React · Vue · Three.js · Electron · TypeScript · Python

Experience (cont.)

2020 — 2021 *Budapest, Hungary*

Profirent Kft.

Junior Software Engineer

- Automated rental management workflows with VBScript
- Built a Python computer vision pipeline to process years of document backlogs, eliminating ~300 hours of manual work

Python | PyTorch | Google Tesseract | VBScript

Education

2022 — 2024 *Lyngby, Denmark*

Technical University of Denmark

MSc. Autonomous Systems

- Specialized in Computer Vision and Deep Learning for Autonomous Systems
- Thesis project: Global Localization of Earthly Images powered by Deep Learning

2018 — 2022 *Budapest, Hungary*

Budapest University of Technology and Economics

BSc. Mechatronics Engineering

- Specialized in Cyberphysical Systems and Robotics
- Thesis project: Implementing Additive Manufacturing Processes in Digital Twin Systems

Projects and Achievements

2025 — Present *Budapest / Copenhagen*

edda — Two-site self-hosted infrastructure

Personal project

- Two-site homelab (Budapest / Copenhagen) and a cloud edge node, meshed over Tailscale; both sites behind CGNAT with a single public entry point and split-horizon DNS
- Fully reproducible from code: Terraform for guest lifecycle, Ansible for OS and service config; any node rebuilds from a minimal OS image with one playbook run

Terraform | Ansible | Proxmox | ZFS | k3s | Docker | Tailscale | Prometheus

2024 *Copenhagen, Denmark*

LOCUS Image Geolocation Webapp

MSc. thesis project

- Full stack Deep Learning project with webapp deployed on the cloud
- Implemented a novel method for global image localization using deep learning
- Developed using cutting-edge technologies in MLOps, Webdev, and Deep Learning

SvelteKit | TailwindCSS | TypeScript | PyTorch | Polars | PostgreSQL | Docker

2023 *Lyngby, Denmark*

Teaching Assistant at Technical University of Denmark

Machine Learning and Data Mining | MLOps | Introduction to Programming

- Assisted students in understanding complex topics in Machine Learning and Data Mining
- Communicated complex ideas clearly across skill and language barriers
